

REMARKS

In the Office Action dated April 10, 2007, claims 1-42 were rejected on the ground of non-statutory obviousness-type double patenting over claims 1-33 of U.S. Patent No. 6,385,031.

Appln. Serial No. 10/708,182  
Amendment Dated July 10, 2007  
Reply to Office Action Mailed April 10, 2007

**INFORMATION DISCLOSURE STATEMENT**

A Supplemental Information Disclosure Statement is submitted herewith.

### OBVIOUSNESS-TYPE DOUBLE PATENTING REJECTION

Claims 1-42 were rejected on the ground of non-statutory obviousness-type double patenting over claims 1-33 of U.S. Patent No. 6,385,031 (hereinafter the "'031 patent").

It is respectfully submitted that the present claims are non-obvious over claims 1-33 of the '031 patent.

Claim 1 of the present application recites a *sealed chamber* containing a dielectric element, and conductors in the *sealed chamber*. The provision of such a sealed chamber is not hinted at or suggested in claims 1-33 of the '031 patent. Therefore, present claim 1 is non-obvious over claims of the '031 patent.

Independent claim 33 similarly recites microelectromechanical elements that comprise a sealed chamber containing at least one of a dielectric gas and dielectric liquid, and conductors in the sealed chamber. This feature of claim 33 is not suggested or hinted at by claims 1-33 of the '031 patent. Therefore, claim 33 is also non-obvious over claims 1-33 of the '031 patent.

Independent claim 25 recites a switch having electrical conductors and a dielectric material between the conductors, where each of the conductors has a curved side. A conductor having a curved side is not suggested or hinted at by claims 1-33 of the '031 patent. Therefore, claim 25 of the present application is also non-obvious over claims 1-33 of the '031 patent.

Independent claim 28 recites a switch comprising nanotube electron emitters, which is not suggested or hinted at by claims 1-33 of the '031 patent. Independent claim 37 recites a nanotube electron emitter, which is not suggested or hinted at by claims 1-33 of the '031 patent. Independent claim 40 recites a switch having conductors and at least one of a nanotube electron emitter and a radioactive isotope electron emitter, neither of which is suggested or hinted at by claims 1-33 of the '031 patent. Therefore, claims 28, 37, and 40 of the present application are also non-obvious over claims 1-33 of the '031 patent.

In view of the foregoing, withdrawal of the double patenting rejection is respectfully requested.

Appln. Serial No. 10/708,182  
Amendment Dated July 10, 2007  
Reply to Office Action Mailed April 10, 2007

Allowance of all claims is respectfully requested. The Commissioner is authorized to charge any additional fees and/or credit any overpayment to Deposit Account No. 20-1504 (SHL.0072P2US).

Respectfully submitted,

Date: \_\_\_\_\_
